

UAP

LIMITED

Introduction

UAP Limited was established in 1996 and has since become a leading UK supplier and distributor of decorative door hardware and specialised Locksmith tools and security products. With 18 years of quality products, excellent service and competitive prices, UAP has grown from strength to strength, year on year and expanded significantly. We have an in house Research & Development Department, meaning we are constantly enhancing our current ranges as well as introducing innovative state-of-the-art products that are not only practical and beautifully designed, but also put through stringent quality control checks at every stage of development. From door knockers, door viewers, letterplates, letters and numerals to cylinder locks, security products and more, all of our products are available in a wide range of sizes, colours, materials and finishes to ensure we can meet every possible requirement.

48 Hour Delivery Policy*

Our 48 hour delivery promise is targeted on all stocked products.

5 Year Product Guarantee

All products inside this brochure come with up to a 5 year guarantee except the Nanocoast® range which is a lifetime coating guarantees.

Salt Spray Testing

All of our letterplates in this catalogue have been salt spray tested to ASTM B117 for 480 hours, apart from the Nanocoast® range which has been salt spray tested for 2,000 hours.

Anodised Coatings

The anodised coating used on our Aluminium Letterplates conform to ISO 7599 AA15 and comes with a 10 year colour fastness guarantee.

Guarantee

The guarantees mentioned in this brochure are for guidance only and unless otherwise stated, only relates to products being used in inland areas which are defined as 25 miles from the coast, or 5 miles from highly polluted industrial areas. Please ask your UAP account manager for copies of the guarantee wording covering your product of interest and please talk to your account manager about any specific application you might have.

*48 hours means 2 working days. Product colours may vary slightly from the actual photograph.

An ethical approach to business

'Quality Products That Don't Cost The Earth' isn't just our sales slogan, but a statement about our wider philosophy.

It means we value our people and our planet and we are keen to make a positive difference to the wider communities we touch through our work and via the profits we make.

For everyone at UAP, our ethical policy isn't just a statement that is allowed to gather dust in a file somewhere, but rather something we all show through taking real action. So in practice this means;

Reducing our carbon footprint

Thanks to the UK registered charity 'www.pattfoundation.org' we have offset all of our carbon emissions. We have funded the planting of more than 56,000 trees over the course of a three year reforestation project, which will enable the reintroduction of many endangered and native wildlife. We have also finished the installation of solar panels on our buildings.

School projects

After teaming up with local charity, DCWC Nepal, we have helped to fund the building of 5 much needed community primary schools in one of the poorest countries in the world. Before the scheme, children as young as 5 years old had to endure an exhausting and dangerous 4 hour walk to and from school, 6 days a week. To raise awareness of this worthy cause, we have worked closely with former Coronation Street star Sean Wilson, best known as Martin Platt, who opened the schools on our behalf. To date, the scheme has given more than 1,000 children the opportunity to learn and better their lives.

Charity support

In 2010, we hosted a Charity Ball to raise vital funds for DCWC Nepal to immunise 10,000 children from tuberculosis. In the wake of the 2011 tsunami and earthquake disaster in Japan, we supported the Red Cross through donations. We have also supported Comic Relief through the charity bids known as Twit Relief. On top of this, several members of staff participate in charity runs every year to raise money for The Christie and Breast Cancer Research UK.

WINDOW SECURITY

Window Restrictors

The MAX6MUM SECURITY® Window Restrictor is designed to prevent children from falling out of windows, something which, according to The Royal Society for the Prevention of Accidents, happens to more than 4,000 children under the age of 15 every year.

4,000
children under the
age of 15 fall out of
windows each year

Advantages

- Can be used on all types of windows and doors including uPVC, aluminium, wooden and metal profiles
- 20cm long restrictor cable
- Can withstand forces over 100kg (980Nm)– Industry standard is only 50kg
- Comes with 1 locking key
- Can be used on fire escape windows
- MRSA resistant plastic used
- Exceed strength requirements of EN 16281

Sash Jammers

Sash Jammers are a must have security device for uPVC windows and doors. They offer quick and low cost addition security for the home. The sash jammers can be fitted to doors or windows which

open in or out, preventing the levering of the sash or door leaf. With just a twist of the sash jammer handle, it is secured over the frame, offering resistance to deter forced entry.

Comes with 1mm and 2mm Packers

DOOR SECURITY

2* Cylinder Guards

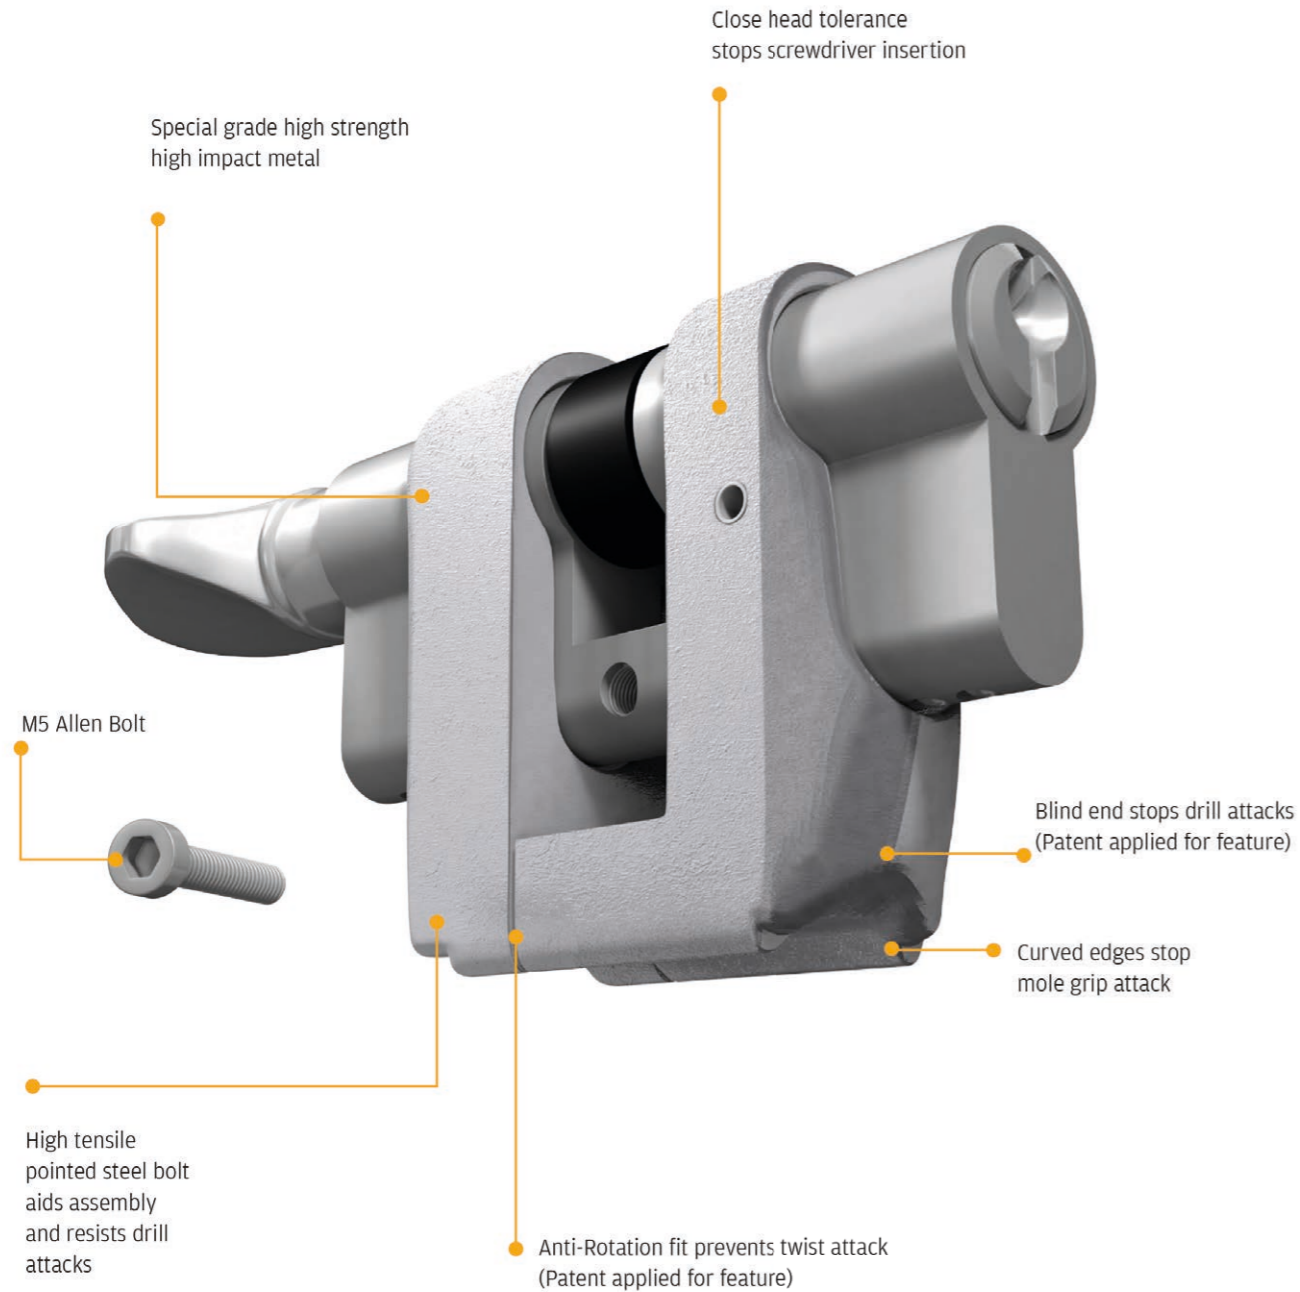

The TS 007:2012 2 Star cylinder guard offers the most affordable way to three star security, when combined with a UAP Zero Lift 1 Star Cylinder. Cylinder guards are ideal for door manufacturers and fabricators who want a low cost, high quality route to Secured by Design 3 star status.

The Patent Pending Cylinder Guard offers flexibility as it can be used with any handle and will fit almost any Euro Cylinder.

Designed to combat drill attacks, it has many patented features not found on other cylinder guards:

Features

- Anti-Drill Design—shaped body prevents drill attacks
- Unique Hardened Steel Anti Drill Plate
- Pointed Anti-Drill High Tensile Steel Bolt
- Patent Pending Anti-Axial Rotation Lugs
- 2 versions covers 95% Multi Point Locks in the market
- Low cost route to 3 star status
- Secured by Design Approved
- BSi Kitemark TS 007: 2012 2 Star

Hidden Fix Letterplate Shrouds

Key Fishing / Letterplate Fishing is a technique burglars use to get hold of keys, purses, handbags and more without even having to enter a property! They simply push open a letterbox flaps and use a long hooked rod, similar to a fishing rod, to 'fish' for keys and handbags. Meaning they can then use the keys to just walk into a property and help themselves to anything they want before driving off in a car!

Hidden fix letterplate shrouds have been developed to prevent this from happening. This simple but effective device is 14.5" long and stops the inner flap opening more than 40 degrees and so stops unwanted hands being able to manoeuvre a rod inside.

TS008 Letterplate Shroud Extensions

The new PAS24 requirements are to meet the new TS008 standard. It is all to do with key fishing and stopping people gaining access to open the thumbturn cylinder.

However this test has been revised, and the letterplate shroud and thumbturn have to be in line on the door. What this means is that every letterplate shroud in the market will fail the TS008 standard, as it is possible to get around to the thumbturn using wires!

To overcome this we have developed an extension arm on the hidden fix letterplate shrouds. We have one for both the left and right side of the letterplate depending on which side the thumbturn is on. This extended arm fits into the current letterplate shrouds and it is impossible to get any wires around it to open the thumbturn. We currently have these in gold, silver and white (colour matched to the letterplate shrouds).

Door Closers

The door closers have been tested to give at least 60 minutes fire spread resistance and are covered with up to 10 year guarantees. The Architectural Door Closer is size 3 and available in a silver or black finish and has a two valve adjustment to incorporate closing and latching speeds. They include universal applications—none handed for standard top jamb and come as either parallel or corner bracket fit.

Features

- 2 Valve adjustment to incorporate closing and latching speeds
- Universal applications – none handed for standard top jamb
- Parallel or corner bracket fit and installation
- Part of the Firecheck range
- Size 3
- Parallel arm bracket included
- Meets EN 1154 1996 + A1 2002
- Meets EN 1634 FD 60 Timber / FD 240 Steel

Identity Card Entry Slots

The ID Card Entry Slot is the ultimate security accessory for protection against rogue traders and bogus callers. It enables the homeowner to check the ID of a caller without having to open the door; they simply lift up the sliding latch on the inside to allow the caller to slip the card through.

The ID Card Entry Slot allows the occupier to receive the ID Card easily without the awkward fumbling that occurs when trying to receive it through the letterbox. It also enables the occupier to thoroughly check the ID without the pressure of the caller standing in the doorway.

This ID Slot also acts as a visual deterrent to would-be-criminals; it shows them that the homeowner is aware of and prepared for bogus callers.

Door Chains

Made from steel, the door chains are made extra strong with individually welded links, and can withstand an exceeding breaking force of 200Nm. The door chains consist of three parts; the chain, the holder and the receiving plate, comes with fixing screws.

Features

- Available in sliding or 3 piece versions
- Exceeds breaking force of 200Nm
- Extra strong individually welded links
- Made from steel
- Fits any door
- Up to a 2 year guarantee

Door Restrictors

Made from zinc, the extra strong door restrictor gives the highest possible security against forcible door entry and is the ideal choice for anyone with limited hand movement or arthritis as there is no chain to deal with, just a solid locking bar. It consists of two parts; the moving arm and the receiving plate, and comes with fixing screws.

Features

- Consists of two parts; the moving arm and the receiving plate
- Extra strong solid bar
- Fits any door
- Ideal for people with limited hand movement or arthritis

Hollow Wall Fixing Anchors

Hollow wall anchors are used to fix the screws into the plastic door frame to get a good, solid fix. The reason these are needed is because a window frame maybe 2mm thick, so there is not enough material for the screws to grip. These are especially needed when fixing many products such as door chains etc. into thin skins of uPVC panels or composite door skins.

Unlike other wall fixings, we adjusted the grip spike to get a good fix, but not making it too big so that it can shatter or crack plastic. We then specified counter sunk bolts in either Brass or Chrome, so they suit most colour by volume, and fits into our counter sunk furniture. Each pack comes with 6 fixings and plated bolts:

Rack Bolt Set

Our rack bolt sets consist of a high quality pair of bolts which have been tested to over 50,000 cycles meaning it will last a long time. It includes fitting screws and can be fitted to any wooden or composite door. They have surpassed BS EN 12051 standards for durability, fire resistance and corrosion resistance. Each set comprises 2 Rack Bolts, 1 Rack Bolt Key, and 2 sets of escutcheons: White, Polished Brass and Polished Chrome.
