

We have been asked many times to develop a budget Rim Cylinder, however we didn't want to just launch something that was the same as what is currently already on the market. Instead we sat back, asked a lot of questions and sampled a lot of product. And now we have what we believe to be one of the best Rim Cylinders on the market! Each Rim Cylinder is 6 pin, and packed full of security features including our Patented anti-bump system, and anti-drill and anti-pick feature.

As an important added feature, the Rim Cylinders can be keyed alike to the UAP cylinders which is a very important requirement. Furthermore, we offer a full Master Suiting service for these products!  
 So how good is the UAP Rim Cylinder?  
 We think it is the best value for money, feature packed Rim Cylinder on the market!

Keyed alike in Pairs from stock or custom built

Keying different sizes to the same key

## Rim Cylinders

Hardened steel key pins and driver pins add an anti-drill feature

Conforms to latest EN1303:2015 standards

Full keyed alike and mastersuite services available

Super smooth operation due to the unique anti-bump timing pin system

### ANTI BUMP

The cylinder has a unique and patented anti-bump system which does not use trap pins. This system makes the turning of the cylinder key extra smooth.

### ANTI DRILL

7 x hardened steel anti-drill pins are in each side of the cylinder. Plus all moving pins are nickel plated hardened steel 50 HRC minimum.

### ANTI PICK

Minimum of 3 anti-pick pins in each side of the cylinder makes it extremely difficult for a common burglar to pick the cylinder.
