

## DOOR RESTRICTORS

Safely restrict the opening of your customer's doors with the extra strong UAP door restrictors to identify and communicate with unknown visitors and deter forced entry.

Made from zinc, the UAP door restrictors give the highest possible security against forcible door entry and is the ideal choice for anyone with limited hand movement or arthritis as there is no chain to deal with, just a solid locking bar.

The door restrictors consists of two parts; the moving arm and the receiving plate, and comes with fixing screws.  
The door restrictors are very easy to fit and use, and will fit onto any door.

Easy alternative  
to a door chain

Made from zinc

Secure a door  
without the need  
for chains - just  
a solid locking bar

1 Hour Fire Rated

Ideal  
for people  
with limited  
hand  
movement or  
arthritis

To compliment the Door Restrictors, we have also developed hollow wall anchors. Hollow wall anchors are used to fix the screws into the plastic door frame to get a good, solid fix.

The reason these are needed is because a door frame maybe 2mm thick, so there is not enough material for the screws to grip. These are especially needed when fixing many products such as door chains etc. into think skins of uPVC panels or composite door skins.

Unlike other wall fixings, we adjusted the grip spike to get a good fix, but not making it too big so that it can shatter or crack plastic. We then specified counter sunk bolts in either Brass or Chrome, so they suit most colour by volume, and fits into our counter sunk furniture. Each pack comes with 6 fixings and plated bolts.

## Features Include:

- 1 Hour Fire Rated
- Made from zinc
- Designed for people with limited hand movement and arthritis
- Easy alternative to a door chain
- Secure a door without the need for chains – just a solid locking bar
- Available in 3 different finishes

## Dimensions:

Moving Arm Length = 105mm  
 Moving Arm Width = 23mm  
 Receiver Plate Length (to Fix to Door) = 62mm  
 Receiver Plate Width (to Fix to Door) = 22mm  
 Chain Holder Length (to Fix to Door) = 62mm  
 Chain Holder Width (to Fix to Door) = 22mm  
 Material = Zinc
