

HIDDEN FIX LETTERPLATE RESTRICTOR SHROUDS & EXTENSIONS

Developed for homeowners throughout the UK that primarily have letterplates fit onto their doors, this restrictor shroud offers added home and door security. There is a new form of burglars these days and what they do is "fish" through the post crevice. If there isn't a security letterplate or shroud fitted onto the door then the likelihood of them successfully grabbing a wallet, the keys to the vehicle, or worse, the keys for the home is highly increased.

The letterplate restrictor shroud features the impressive hidden fix technology, as it doesn't leave any visible fixings. By preventing the inner flap from opening more than 40 degrees, unwanted hands cannot manoeuvre a rod within the crevice and attempt to grab anything from inside. At 14.5" long it's a great option when combined with a number of available letterplates on the market.

SHROUD EXTENSIONS

To overcome people being able to manipulate the thumb turn using straps from the outside, we have developed an letterplate shroud extension arm on the hidden fix letterplate shrouds.

They come available as either left and right handed, depending on which side the thumbturn is on. This letterplate shroud extension arm fits into the hidden fix letterplate shrouds and it is extremely difficult to get any wires around it to open the thumbturn. We currently have these in gold, silver and white (colour matched to the letterplate shrouds).

Finish	Right Handed	Left Handed
Gold	SHHFGEXTR	SHHFGEXTL
Silver	SHHFSEXTR	SHHFSEXTL
White	SHHFWHETR	SHHFWHEXTL

Features Include:

Great protection against key fishing

Prevents the letterplate inner flap opening more than 40 degrees

Prevents rods being pushed through the letterbox

14.5" long means it fits most letterplates

The Hidden Fix technology doesn't leave any visible fixings on the exterior of the home and protects it from being removed from the outside

Available as part of the UAP Nanocoast range which comes with a LIFETIME coating guarantee!
