

Fullex patio door lock has been designed to offer high security and long term reliability. It is available in 2 versions: 1414mm 6 hook and 1753mm 8 hook. They are suitable for all major PVCu profiles and boast exceptional security as well as durability.

Each patio door lock has been manufactured using Austenitic stainless steel, offering maximum corrosion resistance and creating a long lasting, durable product.

As with all Fullex Locks, the patio door lock is both Secured by Design licenced and PAS24 tested.

PAS24 tested

Available in 1414mm 6 hook and 1753mm 8 hook versions

Opposing stainless steel hooks and centre anti lift bolt

Inclusive mishandling device to prevent damage to lock and keep

Shootbolt extendable at top and bottom as standard

One piece stainless steel keep

Cycle tested to 100,000 operations

## Technical Data

### Corrosion Resistance

BSEN1670 Grade 5 (480 hours)

### Cyclic Operation

Cycles Tested to 100,000 cycles

## Materials

### Top and Bottom Hooks

Stainless Steel

### Anti Lift Bolt

Stainless Steel

### Faceplate

Stainless steel faceplate

### Gearbox

Silver passivated centre gearbox

### One Piece Keep

Stainless steel

For maximum security the patio door lock can be used with the Kinetica 3 star BSI Kitemarked TS007 cylinder.

Whether you choose the 6 or 8 hook option, all hooks are opposing which makes it extremely difficult to lift them out. There is also a central anti-lift bolt to make this even more challenging.

On either patio lock, there is the option to add shootbolts at the top and the bottom. The shootbolts fire out securing the door further when it is locked.

Fullex Patio Locks have also been designed with an inclusive mishandling device. The device pushes in when the door is fully closed which then allows for the lock to be operated. This not only makes locking the door much smoother but also prevents damage to both the lock and the keep.

**Faceplate = 1414mm x 16mm (Stainless Steel):**
