

Salamander

FIRE RATED DOOR HINGES

The Salamander Fire Rated Door Hinges are versatile butt type hinges which have been designed for timber doors and fit either on the left or on the right side of a door.

Though many consider the hinges to be simply what holds the doors in place they actually play a major role in door security. This special door hardware goes far beyond the obvious and its durability and overall strength is essential to ensuring that intruders stay out.

These fantastic Fire Rated Door Hinges are 44mm and have not only been tested in accordance with EN1935:2002 standards, but they also meet Certifire testing standards for both FD30 and FD60. Receiving Certifire certification means that after stringent testing the Fire Rated Door Hinge has proven to withstand the effects of a fire and remain intact on the door for at least 30 minutes.
