

## 12 INCH iPLATE LETTERPLATE

For 40–80mm Door Profiles

The 12 inch iPlate Letterplate, considered the most innovative letterplate in the world, is the perfect addition to any front door. With so many options available on the market, only few match the remarkable features of the iPlate.

Totally frameless & slim design – there is no frame on the letterplate, making it look very modern. The thickness of the letterplate is also the slimmest back to front dimension in the industry.

Variable sizes – initially suitable for 40-80mm door profiles, the letterplate has sacrificial cut lines on for 24mm and 28mm uPVC door panels.

Traditional brushes in front of the aperture.

Internally sprung with UAP's ultra-reliable torsion bar, to give that extra feel of positive closure.

Outward-facing, draught-excluding brushes discourage vandals placing unwanted items into the cavity.

ANTI SNAP FLAP

ANTI VANDAL

ANTI BURGLAR

## Features Include:

Designed for 40-80mm thick composite and wooden doors

Outward-facing brushes create the Anti-Vandal feature as they discourage vandals from placing unwanted items into the cavity

Outward-facing brushes also means better draught-proofing and makes it easier to post letters through

180 degree opening flap means the flap will not snap off when opened too far

Blind bolts to the exterior of the letterplate prevents the outer frame being unscrewed from the door externally

An internal water seal prevents water getting into the door or panel, and stops letters getting wet

Ultra-flexible springs can withstand the letterbox flap opening thousands of times without breaking

Conforms to many standards and testing requirements including EN13724:2002

Internally sprung with UAP's ultra-reliable torsion bar, to give that extra feel of positive closure

## iPlate Letterplates

Finishes	40-80 Door Opening	Flap Material Construction	Coating Guarantee
