fullex[®] ALUMINIUM DOOR LOCKS

Fullex door locks have been designed to offer high security and long term reliability. They are suitable for all major all metal profiles and boast exceptional security as well as durability.

XL LOCK

PAS 24 tested

Latch hold back snib on lock faceplate

Comes with an anti-drill plate for extra security

Comes with a 10 year guarantee

3 opposing steel hooks and two steel anti lift bolts

Dual, single or split spindle options

One piece or individual keeps

SL16 MULTIBOLT

PAS 24 tested

Inline split spindle

Integral hold back latch function on lock faceplate

Easily reversible latch as standard

Various adjustable security keep sets available

Possible to have an additional single hook

PATIO LOCK

PAS 24 tested

Available in 1414mm 6 hook and 1753mm 8 hook versions

Opposing stainless steel hooks and centre anti lift bolt

Inclusive mishandling device to prevent damage to lock and keep

Shootbolt extendable at top and bottom as standard

One piece stainless steel keep

PATIO INTERLOCK

PAS 24 tested

Interlock with bi-directional hooks

For use on PVCu doors

Comes with a 10 year guarantee

2 pane version and 4 pane version

Patent Pending

EXODUS PANIC EXIT SYSTEM

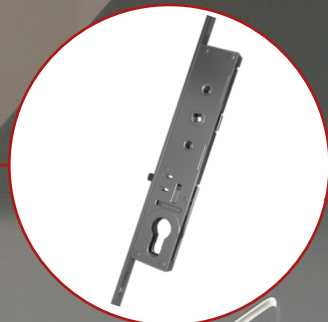

PAS 24 tested

Designed for use with the Fullex XL Lock and the Fullex XL Crimebeater

Comes with matching slave unit with one piece or individual keep sets available

Full width crash bar with optional external handle

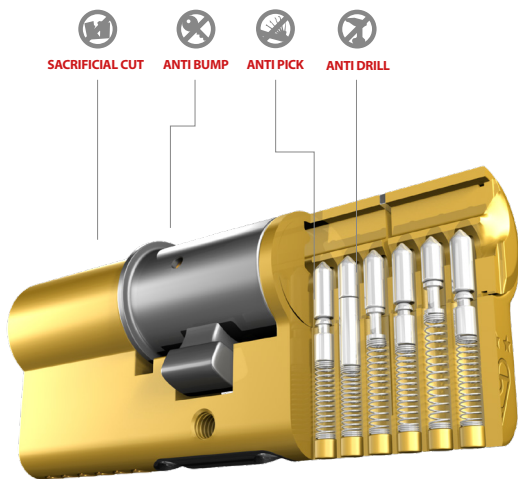

CE marked and comes with a 10 year guarantee

MULTIPOINT LOCKS

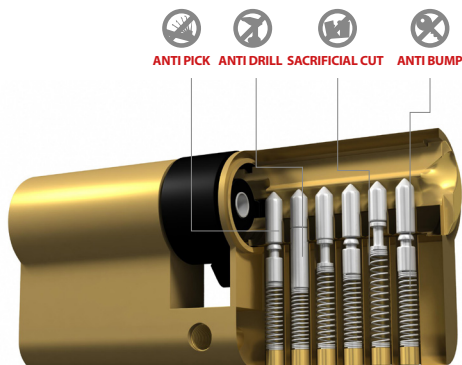

KINETICA®

UAP and Fullex have joined forces to launch our very own 3* Kitemarked Cylinder – Kinetica. The 3* cylinder market has been growing over the last 12 months or so with fabricators understanding the consumer need for greater door security without having to upgrade handles or add extra security devices. UAP and Fullex worked together to develop the best value for money 3* cylinder on the market.

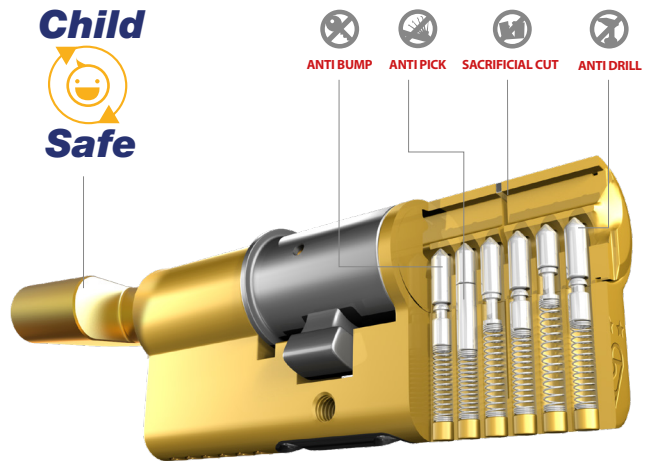

ZEROLIFT® ADVANCE

UAP have developed a large range of 1* Kitemarked euro cylinders which conform to EN1303:2005 standards. The cylinder has been re-engineered from our original Zerolift cylinder, and not only does it combine all the original Zerolift features, but the Zerolift Advance cylinders are also packed with even more functions:

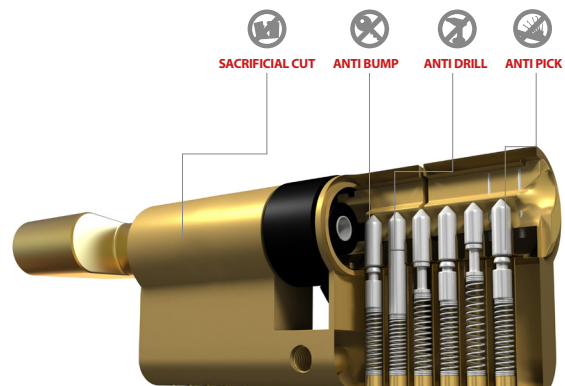

KINETICA®

The KINETICA® Push to Turn Lock (P2T™) protects against the most common forms of burglary. It also offers the unique KINETICA CHILDSAFE™ feature to stop children easily opening the lock and the door. The KINETICA® P2T™ System was inspired by the very effective safety cap on medicine bottles. To lock the door simply lift the handle, gently push the knob in and rotate it. To unlock the door, gently push the knob in and rotate it the other way.

ZEROLIFT® ADVANCE

Each and every cylinder is an extremely high quality 6 pin cylinder, with added security features. All cylinders come complete with anti-pick mushrooms, anti-drill pins and use our patented anti-bump timing pin system. The cylinders are also designed to operate as smoothly and effectively as possible.

1* Cylinder Solution

The escutcheons are ideal to be combined with the ZeroLift 1* Kitemarked high security cylinder. Combining the Nanocoast high security escutcheon with the ZeroLift 1* cylinders will give you a professional security solution.

We have also developed a specially sized 30/35 (65mm) cylinder which is the perfect size cylinder to use with the Nanocoast high security escutcheons!

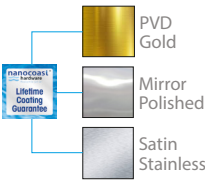

Created in accordance with the British Standard Kitemark, and also awarded the "Secured by Design" approval by the Association of Police Officers, the high quality 6 pin double Kitemarked euro cylinder can be fitted to any door in order to ward off criminals that attempt to use the most popular break-in methods.

ALL STAINLESS STEEL LETTERPLATE

These heavy duty all stainless steel letterplates are sturdier and heavier than any other UAP letterplate, offering a better quality product and making them more resistant.

- Anti-Vandal feature prevents vandals from placing unwanted items into the cavity
- 180 degree opening flap means the flap will not snap off when opened too far
- Conforms to many standards and testing requirements including BS EN 1303:2005
- Ultra-flexible springs can withstand the letterbox flap opening thousands of times without breaking
- Internal water seal prevents water getting into the door or panel, and stops letters getting wet

TS008 LETTERPLATE

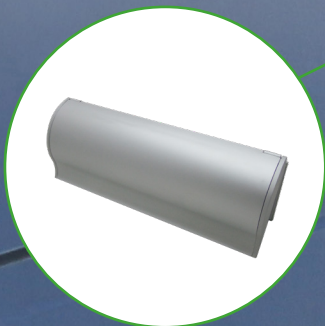

Named after the Goddess of Safety, the Soterian letterplate is stylish, streamlined and secure. It is highly engineered with over 120 different processes in each letterplate, setting it apart from anything else currently on the market.

TS008 has come in to effect that sets the advanced security requirements of letterplates. The updated door standard PAS24:2016, now requires that a door fitted with a letterplate has to have a letterplate that is tested to and meets the requirements of TS008. As well as covering key fishing, TS008 also covers preventing being able to unlock the door through the letterplate, whilst also allowing postal items to pass freely through it.

DOORMASTER®

SIGNATURE RANGE

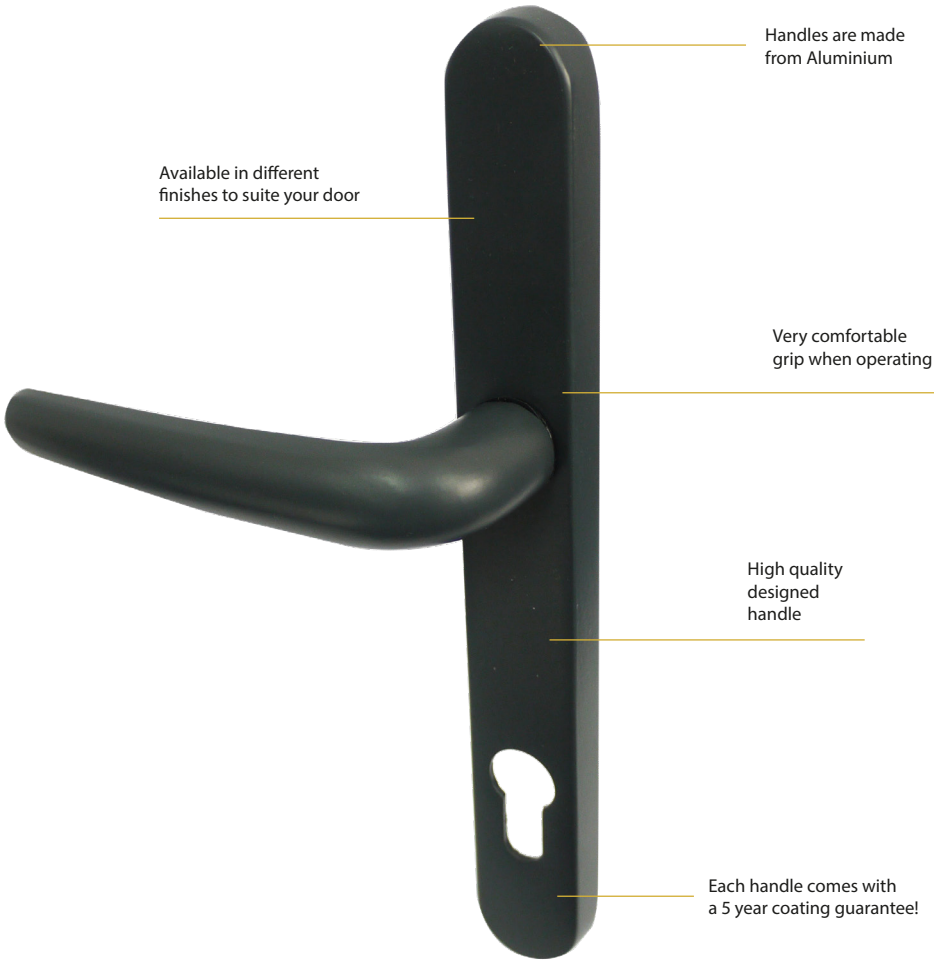

243MM ALUMINIUM DOOR HANDLE

The DOORMASTER® Signature range standard security aluminium door handle has a 243mm long backplate, and is aimed at the fabricator who wants to offer a high quality designed handle. Each handle is made from aluminium and has a 5 year coating guarantee.

Contemporary and modern in appearance, the standard aluminium door handle has been cleverly designed to offer a very comfortable grip when operating.

It is recommended to fit a Kinetica 3* Kitemarked euro cylinder with the door handle in order to give the best security and to achieve a 3 star Kitemark status for PAS 24 doors.
