A smarter Door Lock with simple access control.

The IONIC lock by Fullex-ai with timeless design enables simple access using a Smartphone App. The access logins can be easily managed via mobile phone. An additional feature of the app is the access protocol, in which you can see which users have opened the door.

Due to the simple installation and the easy-to-use access control, the Ionic electronic lock by Fullex-ai is ideal for any domestic properties and social housing.

With the integrated power supply and wireless charging, you can open and close the door using Bluetooth on your mobile phone. The simple and quick installation makes it ideal for factory fitting.

You can register infinity number of door openings in the smartphone App and up to 1500 on the lock itself!

Quick and easy installation

User administration and logging via App

Fits every door

GB Granted patent and a European Patent Application

Unlocking via Bluetooth

Dedicated security escutcheon available

Comes with up to 10 year mechanical guarantee

IMMEDIATE CONFIRMATION THE DOOR IS LOCKED

WIRELESS CHARGING

ULTRA SECURE

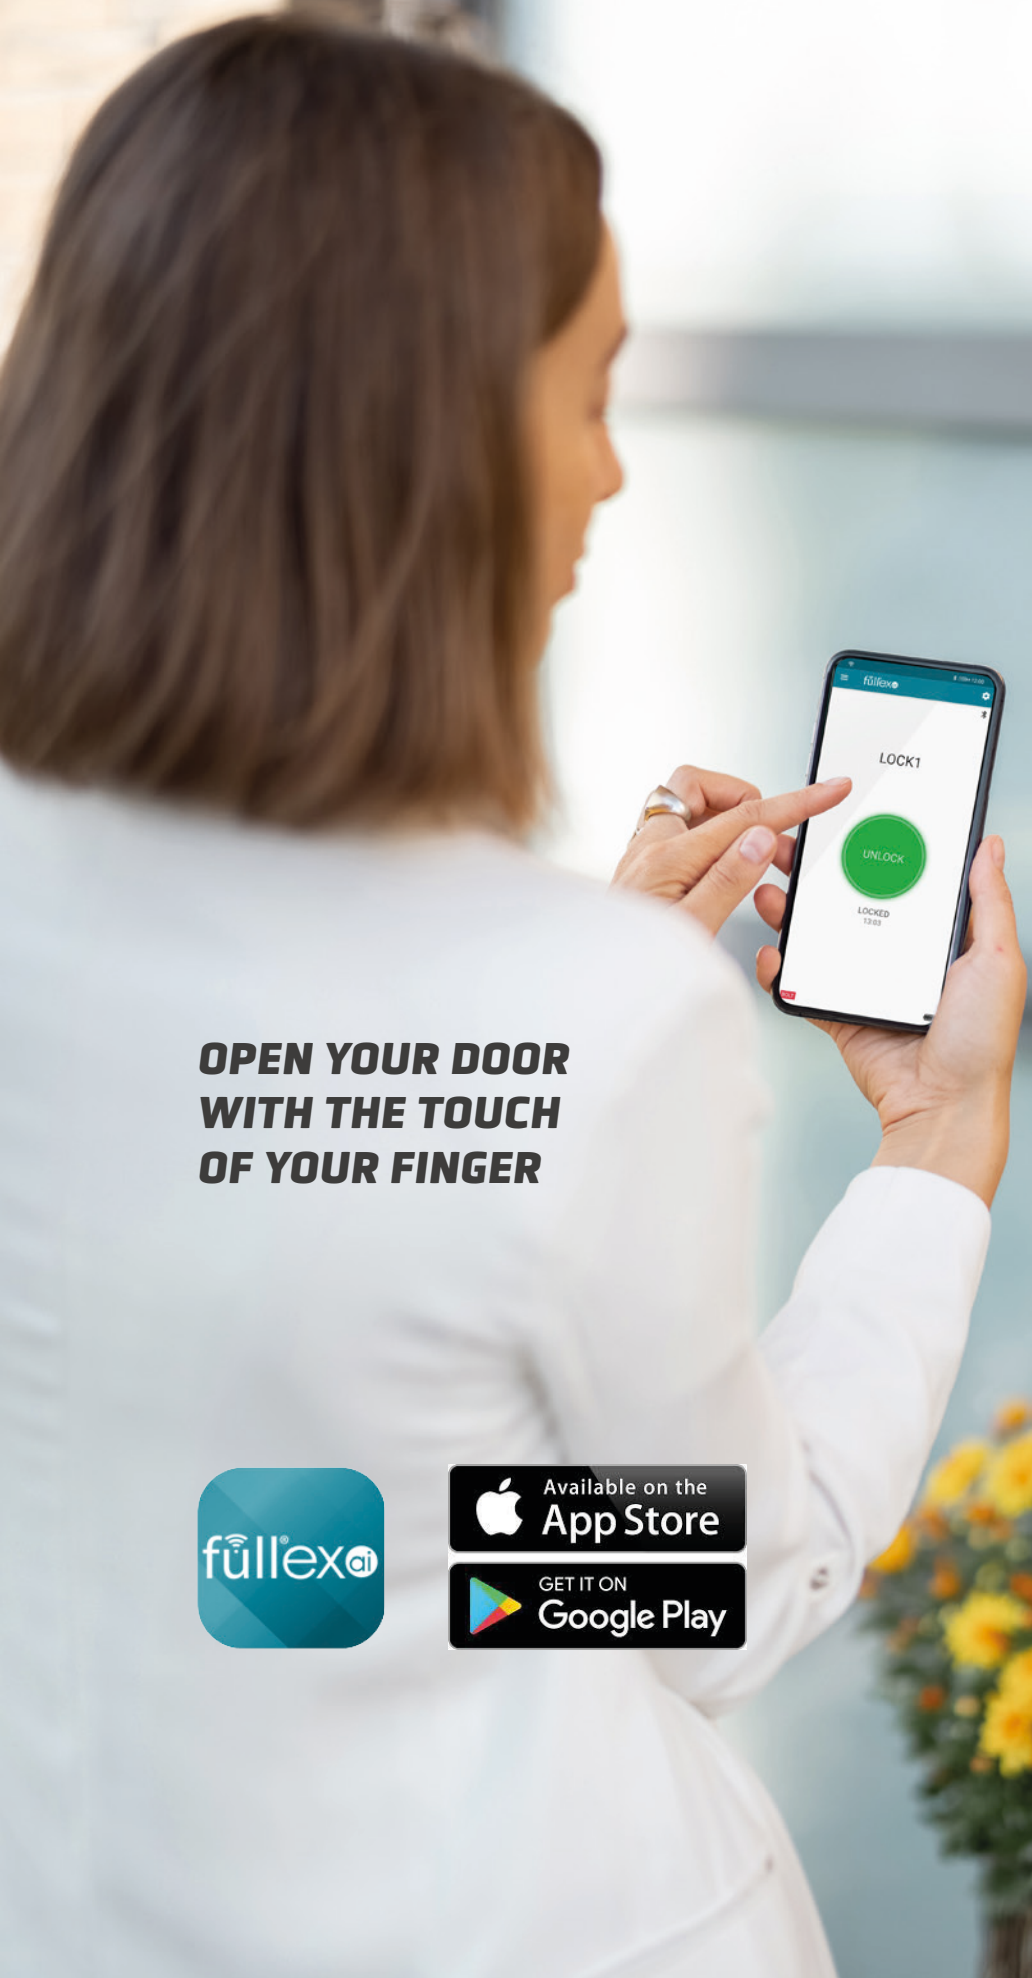

BLUETOOTH COMMUNICATION

The IONIC Electronic Lock by Fullex-ai is accessible using the Smartphone App which comes with a comprehensive user manual. The App is available to download from Google App Store or Apple Store. It is necessary to turn on the Bluetooth module to use the application. You must turn on the location service too on Android.

The IONIC Electronic Lock by Fullex-ai comes with a key fob which can be paired with the App for even easier door access.

fullex[®] TIMBER DOUBLE DOOR LOCKS

The direct fix double door lock is based on the 220 Pro lock mounted on a 16mm full height cover plate for the master door, the slave door side is also based on the 220 Pro centre case in a simplified version with keep adjustment incorporated onto the faceplate.

The lock is made to fit directly into the edges of a over-rebated double door set.

Composite Doors

Timber Doors

Deadbolt throws when the handle is lifted

2 opposing steel hooks, deadbolt and latch

Inline split spindle lock

Easily reversible latch

Includes latch hold back snib on lock faceplate

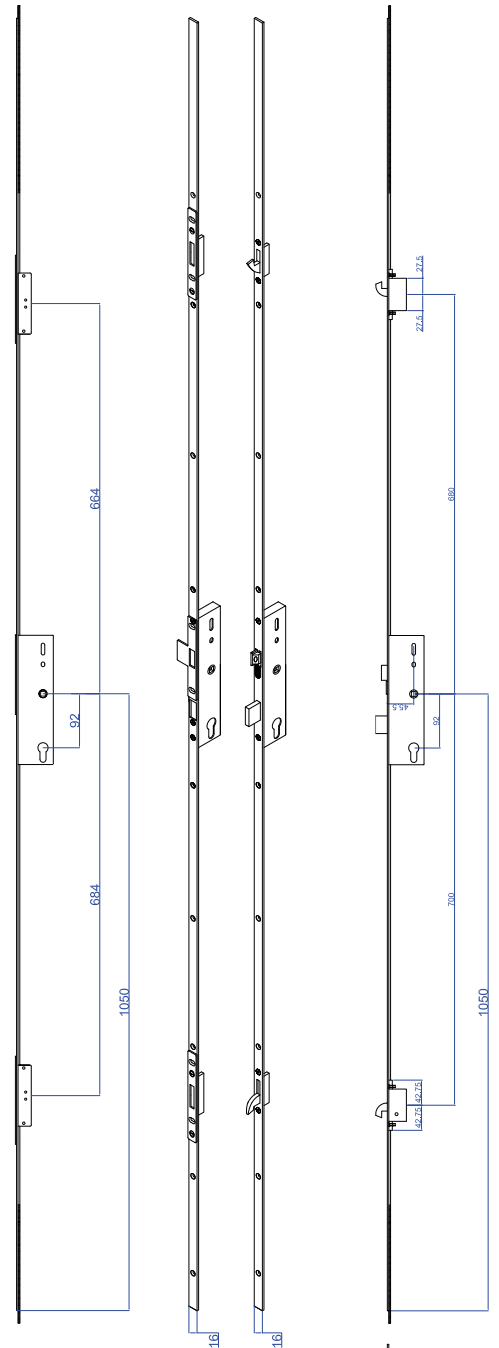

2200mm X 16mm square ends

Composite and timber over rebated double doors

Comes with a 10 year guarantee

Keeps are integrated into the slave door lock face plate

Comes with an anti-drill plate for extra security

Secured by Design

Police Preferred Specification

PAS 24

ENHANCED SECURITY PERFORMANCE APPROVED

For maximum security the Timber Double Door Lock can be used with the Kinetica 3 star BSI Kitemarked TS007 cylinder.

fullex[®] Key Wind Lock

SINGLE DOORS

The Fullex Key Wind lock uses the key or the thumbturn to engage and retract the bolts and the latch. The Fullex Key Wind lock was developed to stop anyone getting in without a key when the door is closed. Our system uses the latch to do this. Once the door is closed you cannot move the latch unless you have a key. If a burglar tried to open the door, say for example if someone has entered the house

with shopping, then they cannot get in. The Fullex Key Wind Lock have minimum key turning with less than a half a turn.

The Fullex Key Wind Lock system offers low maintenance, economic cost and easy to use functionality.

Composite
Doors

Timber
Doors

Aluminium
Doors

Based on the Fullex Crimebeater lock

Operated by thumbturn or key-key cylinder

Non-handed easily reversible latch

Designed for use with pull handles

KINETICA+ K4

The Fullex Kinetica+ K4 Euro cylinder backs up its name as a game changer, by providing you with all the features you would expect from a quality lock but with much more in its locker. Securing premises with a proven performance that's been tested to 100,000 cycles and reinforced by a two-year guarantee.

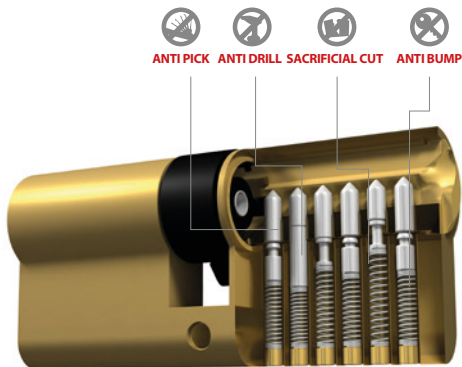

KINETICA+ K4 HORIZONTAL

A new horizontal version of our industry leading Kinetica+ K4 3-star cylinder. As an additional security measure, the Kinetica+ K4 Horizontal cylinder has been designed to allow only single-orientation key insertion. The new horizontal keyway has six dimple pins and five laser track side pins, creating the potential for over 13 million differs, and making the lock even more difficult to pick.

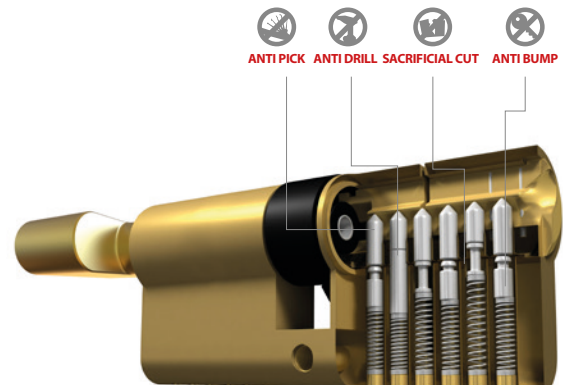

ZEROLIFT ADVANCE

UAP have developed a large range of 1* Kitemarked euro cylinders which conform to EN1303:2005 standards. The cylinder has been re-engineered from our original Zerolift cylinder, and not only does it combine all the original Zerolift features, but the Zerolift Advance cylinders are also packed with even more functions.

ZEROLIFT ADVANCE

Each and every cylinder is an extremely high quality 6 pin cylinder, with added security features. All cylinders come complete with anti-pick mushrooms, anti-drill pins and use our brand new patented anti-bump timing pin system. The cylinders are also designed to operate as smoothly and effectively as possible.

DESIGNER RANGE PULL HANDLES

nanocoast®

The Designer Pull Handles range is made from thick high grade stainless steel and features a stylish design with shiny mirror polished elements. It has a diameter of 38mm for sturdier construction. This range is part of the Nanocoast range, coming with a LIFETIME coating guarantee. The bolt through fixing gives a neater finish and as high grade Stainless Steel is used, the product will not rust and so there will be no leakage if it rains. The handles also comes with an Allen Key and 2 Allen Bolts on each of the up-stands, as well as two fixing points with an individual plate on each.

1* Cylinder Solution

The escutcheons are ideal to be combined with the ZeroLift 1* Kitemarked high security cylinder. Combining the Nanocoast high security escutcheon with the ZeroLift 1* cylinders will give you a professional security solution.

We have also developed a specially sized 30/35 (65mm) cylinder which is the perfect size cylinder to use with the Nanocoast high security escutcheons!

Created in accordance with the British Standard Kitemark, and also awarded "Secured by Design" approval by the Association of Police Officers, the high quality 6 pin double Kitemarked euro cylinder can be fitted to any door in order to ward off criminals that attempt to use the most popular break-in methods.

TS008 LETTERPLATES

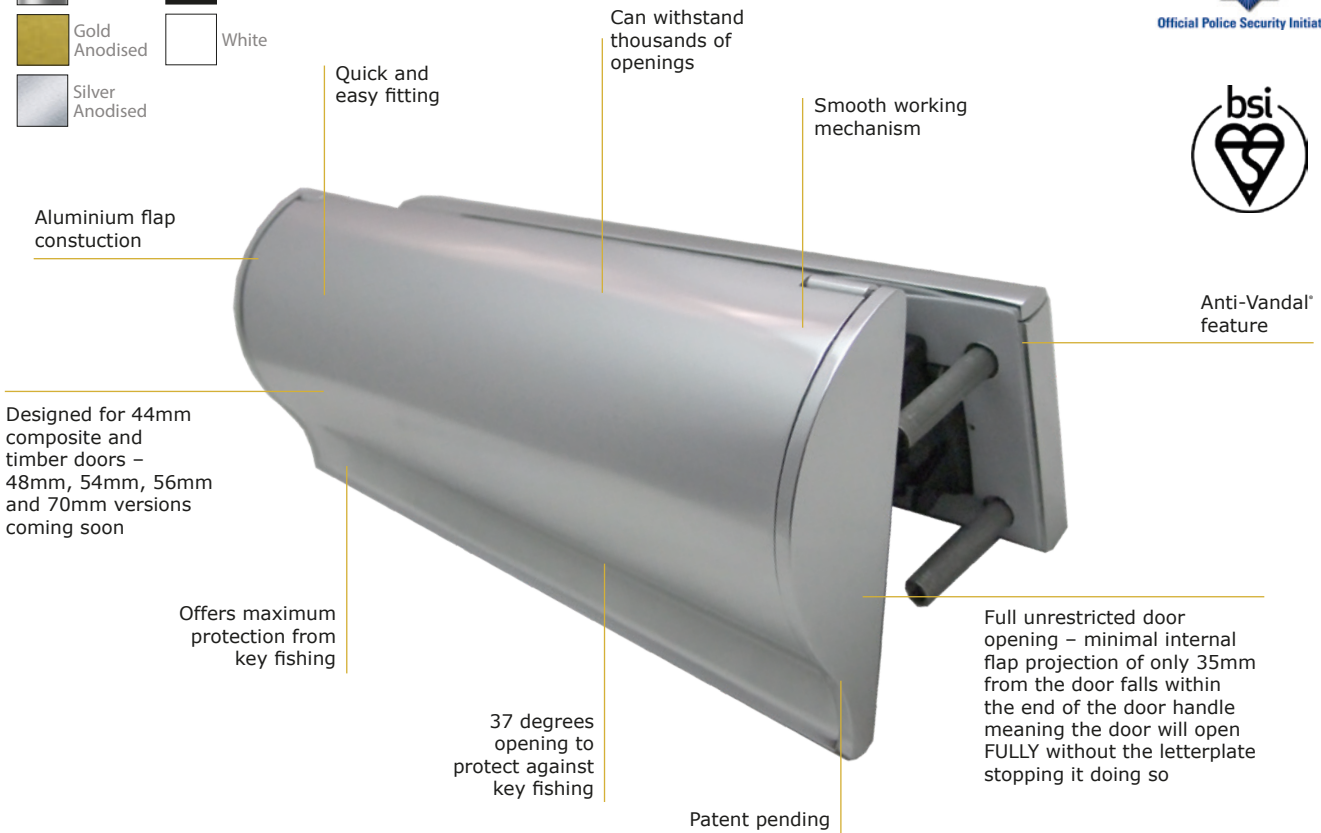

THE SOTERIAN TS008 LETTERPLATE

Named after the Goddess of Safety, The Soterian letterplate is stylish, streamlined and secure. It is highly engineered with over 120 different processes in each letterplate, setting it apart from anything else currently on the market.

TS008 has come in to effect that sets the advanced security requirements of letterplates. The updated door standard PAS 24:2016, now requires that a door fitted with a letterplate has to have a letterplate that is tested to and meets the requirements of TS008. As well as covering key fishing, TS008 also covers preventing being able to unlock the door through the letterplate, whilst also allowing postal items to pass freely through it.

THE SOTERIAN TS008 SLIM LETTERPLATE

The Door & Hardware Federation (DHF) TS008: 2015 sets the advanced security requirements of letterplates. The updated door standard PAS 24:2016, now requires that a door fitted with a letterplate has to have a letterplate that is tested to and meets the requirements of TS008: 2015. As well as covering key fishing, TS008 also covers preventing being able to unlock the door through the letterplate, whilst also allowing postal items to pass freely through it.

CERTIFIRE APPROVED

The Soterian Slim TS008 letterplate has achieved Certifire approval from Warringtonfire Testing & Certification Limited. The letterplate is approved for use with FD30 timber doorsets.

MIX AND MATCH SOLUTION

Our revolutionary mix and match solution gives you the freedom to choose what finish you want for the internal and external frame. Whether it is a black inner frame with a white outer frame, or a traditional gold inner flap and gold outer flap – the choice is yours! Choose from 6 different finishes chrome, gold anodised, silver anodised, polished silver, black and white.

Full unrestricted door opening – minimal internal flap projection of only 35mm from the door falls within the end of the door handle meaning the door will open FULLY without the letterplate stopping it doing so

ALL STAINLESS STEEL FIRE RESISTANT

The All Stainless Steel letterplate is lined with special intumescent material which expands to 50 times its size, blocking the hole in the cavity and preventing smoke coming through the cavity. The All Stainless are specifically designed for areas which are within a 25 mile radius of the coast, or within 5 miles of highly populated industrial areas.

- Uses special heat absorbers to stop hot screws melting the plastic
- Intumescent activated at 5 degrees lower than most in the market
- Designed for 40-80mm thick composite and wooden doors
- Conforms to many standards and testing requirements including BS EN 1303:2005

DUO STAINLESS STEEL DOOR HANDLE

The Nanocoast® DUO door handle has a 243mm long backplate, and is aimed at the fabricator who wants to offer a high quality designed door handle. The DUO door handle has a tube shaped handle, which gives a very comfortable grip when operating.

As the DUO handle suits all needs – working as an attractive high-quality lever handle whilst being DDA compliant – it allows fabricators to carry just one handle in stock to satisfy a number of different applications.

The DUO door handle has a lever that is curved to the door, making it compliant to DDA (Disability Discrimination Act) regulations, making it ideal for applications where aesthetics and compliance are key. As the DUO handle is not BSI Kitemarked, we recommend fitting the Kinetica 3* Kitemarked Euro Cylinder with it in order to achieve a 3* Kitemark status for PAS 24 doors.

HIGH SECURITY STAINLESS STEEL DOOR HANDLE

The Nanocoast® High Security Stainless Steel front door handle has a 243mm long backplate. Both the internal and external part of the handle are manufactured from high quality 316 grade stainless steel offering a high-quality and corrosion resistant front door handle.

These door handles are part of the Nanocoast® range of products, specifically designed for areas which are within a 25 mile radius of the coast, or within 5 miles of highly populated industrial areas. Each front door handle has been salt spray tested to ASTM B117 for 2,000 hours and comes with an industry first LIFETIME coating guarantee, as the products will not pit, rust or corrode no matter what environments you put them in!

SIGNATURE RANGE

The DOORMASTER® Signature range standard security aluminium door handles are aimed at the fabricator who wants to offer a high quality designed door handle. Each door handle is made from aluminium and has a 5 year coating guarantee. Contemporary and modern in appearance, the standard aluminium door handle has

been cleverly designed to offer a very comfortable grip when operating. It is recommended to fit a Kinetica 3* Kitemarked euro cylinder with the door handle in order to give the best security and to achieve a 3 star Kitemark status for PAS 24 doors.

LEVER PAD DOOR HANDLE

Designed for comfort and ease of operation, the DOORMASTER® Pad door handle has a 243mm long backplate.

Each front door handle has a pad shaped external handle. Handles are non-handed and can be used as either a left or right handed, allowing it to fit a range of profiles.

It is recommended to fit a Kinetica 3* Kitemarked euro cylinder with the door handle in order to give the best security and to achieve a 3 star Kitemark status for PAS 24 doors.
