

SLIDING DOOR CHAIN

The UAP sliding door chains are made from high grade steel and what makes it stand apart from other door chains is that it can exceed a breaking force of over 2kN (200Kg). This is achieved by each link in the door chain being individually machine welded, providing additional strength and resilience to forced entry!

To compliment the door chains, we have also developed hollow wall anchors. Hollow wall anchors are used to fix the screws into the plastic door frame to get a good, solid fix. The reason these are needed is because a door frame maybe 2mm thick, so there is not enough material for the screws to grip. These are especially needed when fixing many products such as door chains etc. into thick skins of uPVC panels or composite door skins.

Features Include:

- 1 Hour Fire Rated
- Narrow door chain style
- Made from high grade steel
- Individually machine welded links makes the chains extra strong
- Exceeds breaking forces of over 2kN (200Kg)
- Suitable for every type and door size
- Available in 3 different finishes

Polished Brass

Polished Chrome

Satin Silver

Door Chain Length – 230mm
 Number of Links – 11 Links
 Link Thickness – 3mm
 Link Width – 12mm
 Receiver Plate Length – 84mm

Receiver Plate Width – 37mm
 Chain Holder Length – 50mm
 Chain Holder Width – 17mm

Finishes	Product Code	Material Construction	Coating Guarantee
Polished Brass	DCB	Steel	2 Years
Polished Chrome	DCCH	Steel	2 Years
Satin Silver	DCSS	Steel	2 Years
