WINDOW SECURITY

HIGH SECURITY PERFORMANCE

WINDOW RESTRICTORS

The Royal Society for the Prevention of Accidents provides research that states that over 4,000 children under the age of 15 are injured yearly from unsecured windows which they fall out of, with 2,000 of these accidents involving children under 5 years old. A small yet very effective and extremely affordable solution is the Intelligent Hardware window restrictor.

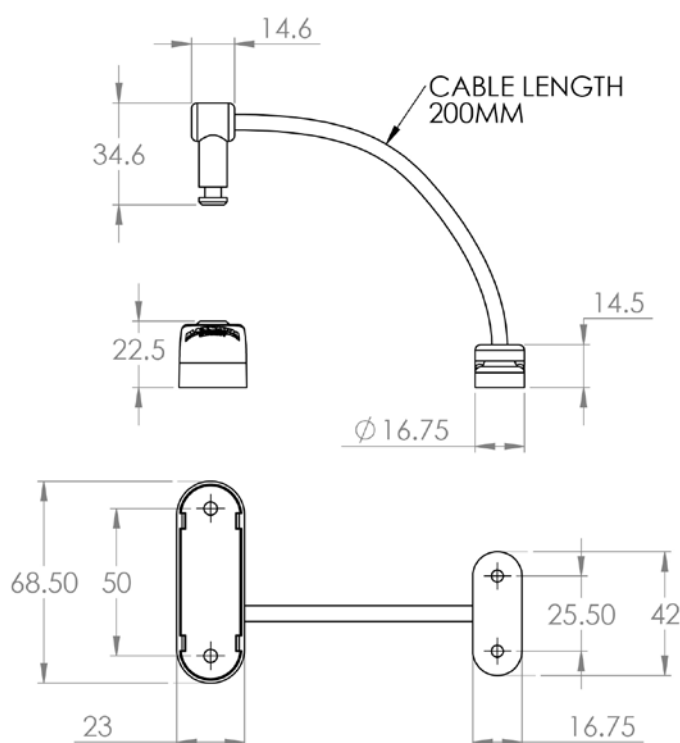

The window restrictor is lockable, and can be unlocked using a key if necessary, and the window will then be able to be opened fully. Due to this reason, it is possible to fit the lockable window restrictor on fire escape windows, provided that the user keeps the key within easy reach.

WINDOW LOCK (SASH JAMMER)

The window lock (sash jammer) is a must have device for uPVC window security and even doors. It offers quick and low cost addition security to home security. The window locks (sash jammers) are available in white and brown, to help match the uPVC frame.

The window lock (sash jammer) can be fitted to uPVC windows and doors which open in or out. It has been designed to prevent the levering of the window sash or door leaf, which is a common burglary technique. Burglars can access uPVC doors and windows by using door spreaders to prise open and lever the window or door open to gain entry. With just a twist of the window lock (sash jammer) handle, it is secured over the frame, offering resistance to deter forced entry.

Designed for uPVC windows and doors

EXTERNAL DOOR HARDWARE

DOOR VIEWER

The Intelligent Hardware Viewer is a great security accessory, as no door should be opened without first checking who is on the other side. Available in PVD gold, mirror polished and satin stainless finishes.

Both our composite and uPVC door viewers come with a free fitting tool.

This tool has been designed to fit on to the end of a drill bit, and makes it quick and easy for consumers to tighten the door viewer without having to screw it together manually.

FIRE RATED DOOR HINGE

The Intelligent Hardware Fire Rated Door Hinges are versatile butt type hinges which have been designed for timber doors and fit either on the left or on the right side of a door.

Though many consider the hinges to be simply what holds the doors in place they actually play a major role in door security. This special door hardware goes far

beyond the obvious and its durability and overall strength is essential to ensuring that intruders stay out.

These fantastic Fire Rated Door Hinges are 44mm and have not only been tested in accordance with EN1935:2002 standards, but they also meet testing standards for both FD30 and FD60.

1* KITEMARKED HIGH SECURITY DOUBLE EURO CYLINDERS

The UAP+ cylinder is the best choice for inexpensive home security installation. Created in accordance with the British Standards Kitemark, and also awarded the 'Secured by Design' approval by the Association of Police Officers, the high quality 6 pin double Kitemarked euro cylinder can be fitted to any external door in order to ward off criminals that attempt to use the most popular break-in methods.

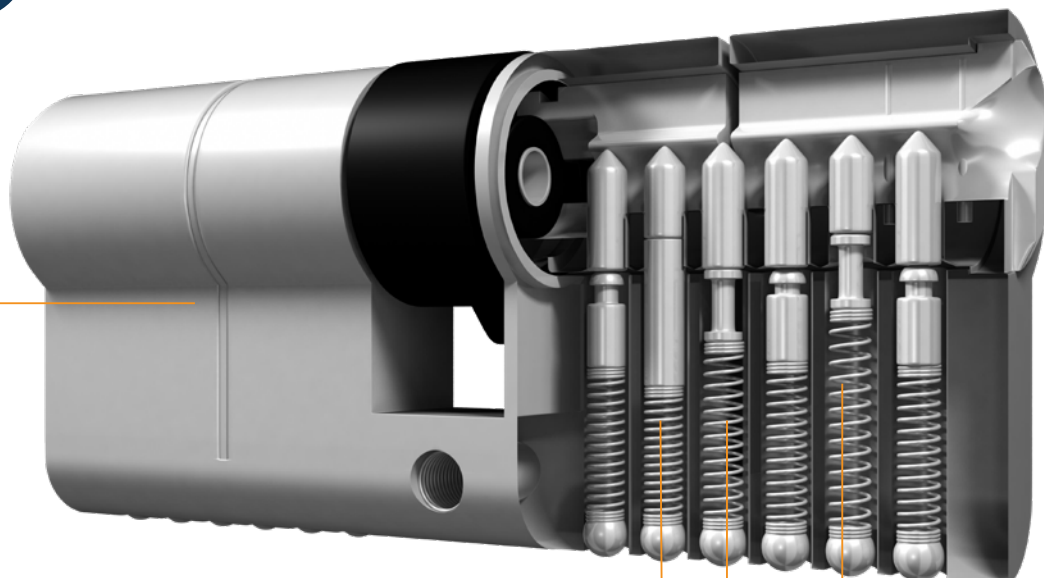

Secured by Design

Police Preferred Specification

COMES
WITH
3 KEYS

SACRIFICIAL CUT

A sacrificial cut line on the outside of the cylinder means if force is applied, the cylinder will break away to this line only leaving the cylinder operational and the locking mechanism intact.

ANTI-BUMP

Anti-bump system, designed by locksmith expert and Royal Navy engineer Chris Belcher. The Patented timing pins are highly effective in interrupting the timing of the pins when bumped.

ANTI-DRILL

Hardened steel anti-drill pins are in each side of the cylinder. Plus all moving pins are nickel plated hardened steel 50 HRC minimum.

ANTI-PICK

Anti-pick pins makes it extremely difficult for a common burglar to pick the cylinder.

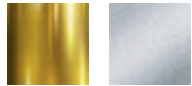

Finish	Double Cylinder Sizes	Thumbturn Cylinder Sizes	Overall Size	Guarantee

DOOR NUMERALS

Self-adhesive front door numbers are 3 inches in height, and are designed in the classic Times Roman font. They are extremely easy to fit, with no skill or tools required to attach the front door number to the door.

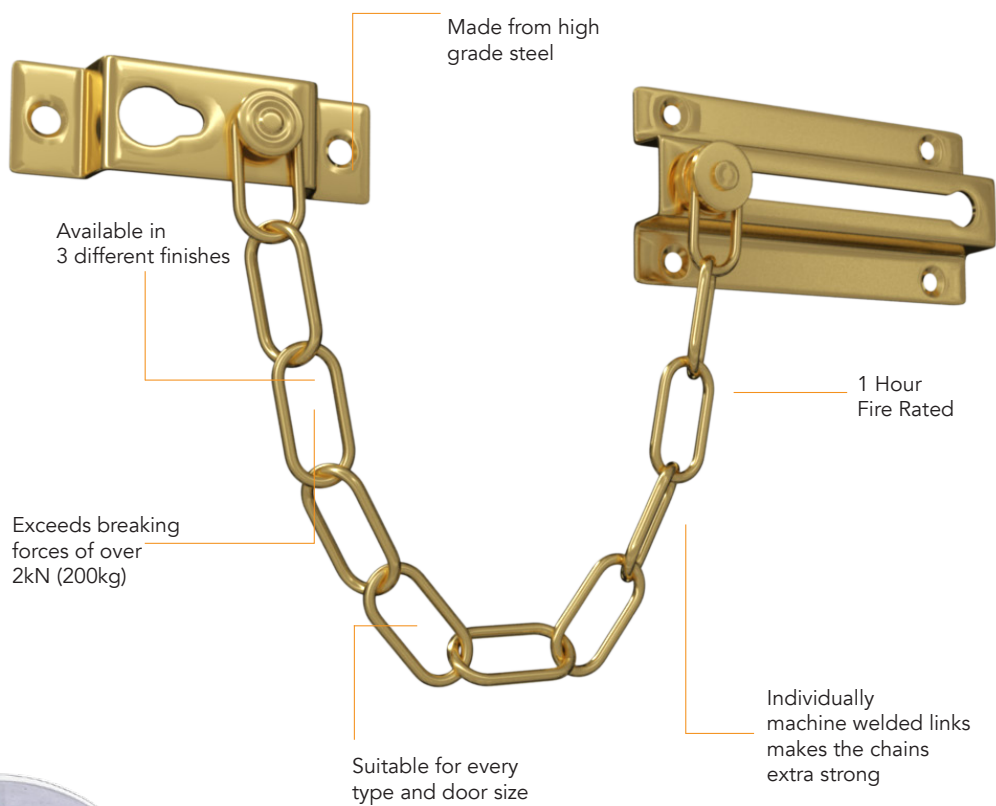

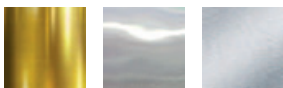

- 1 hour fire rated
- 3 inches in height
- Classic Times Roman font
- Self-adhesive fixing means no markings on the door caused by screws
- Super strong waterproof covering stops water getting behind the number and prevents rusting
- Numerals can be removed if needed – with no damage to the door
- Can be fitted to any wall or surface
- Manufactured from high grade stainless steel
- LIFETIME coating guarantee

STANDARD SECURITY DOOR CHAIN

The Intelligent Hardware sliding door chains are made from high grade steel and what makes it stand apart from other door chains is that it can exceed a breaking force of over 2kN (200Kg). This is achieved by each link in the door chain being individually machine welded, providing additional strength and resilience to forced entry!

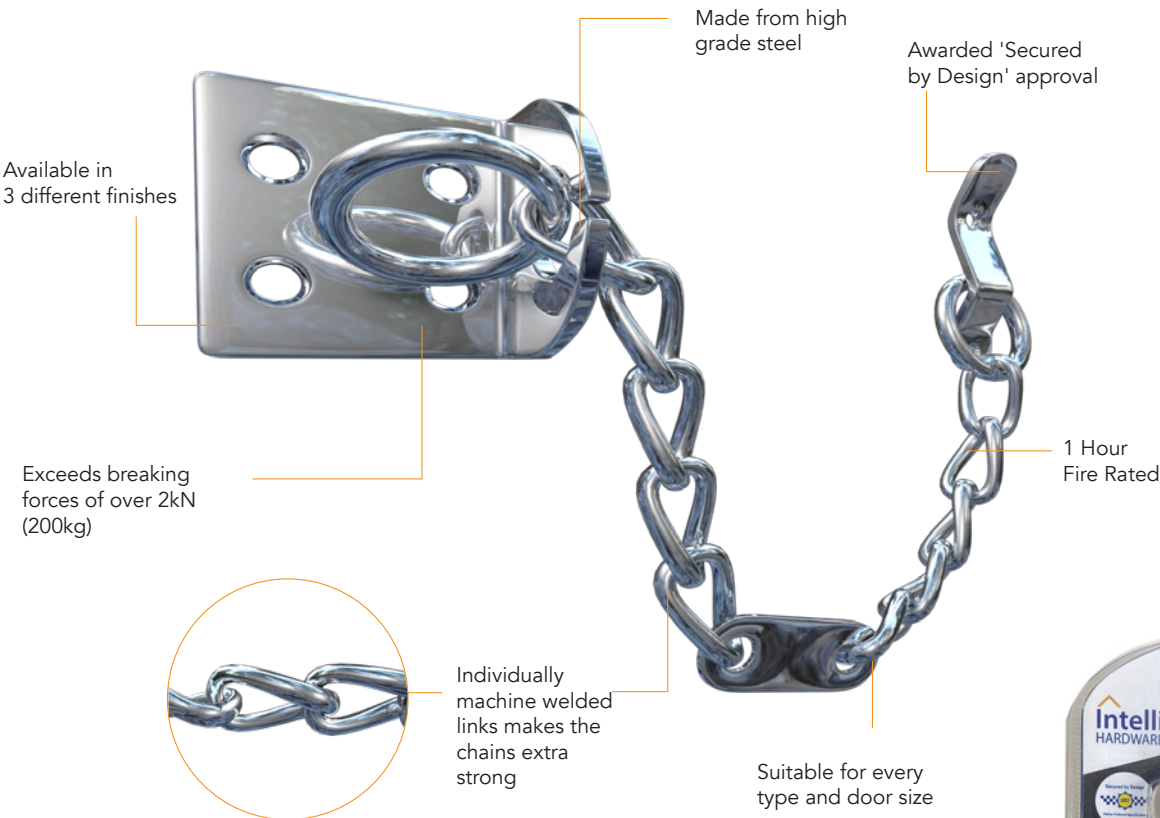

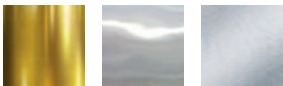

Finish	Material Construction	Code
Polished Brass	Stainless Steel	DCB-IHR
Polished Chrome	Stainless Steel	DCCH-IHR
Satin Silver	Stainless Steel	DCSS-IHR

HIGH SECURITY DOOR CHAIN

The Intelligent Hardware narrow TS003 door chains are made from high grade steel and what makes it stand apart from other door chains is that it can exceed a breaking force of over 2kN (200Kg). This is achieved by each link in the door chain being individually machine welded, providing additional strength and resilience to forced entry!

What is TS003?

TS003:2012 is the most up to date specification for door chains and limiters and is used in numerous standards within the industry including Secured by Design. In order to reach TS003:2012, a door chain is tested to see if it can withstand the effects of extreme and repeated force and abuse. The door chain is put through tests of both 'attack mode' and 'abuse mode' and if it is still intact after these tests have been carried out then it will pass.

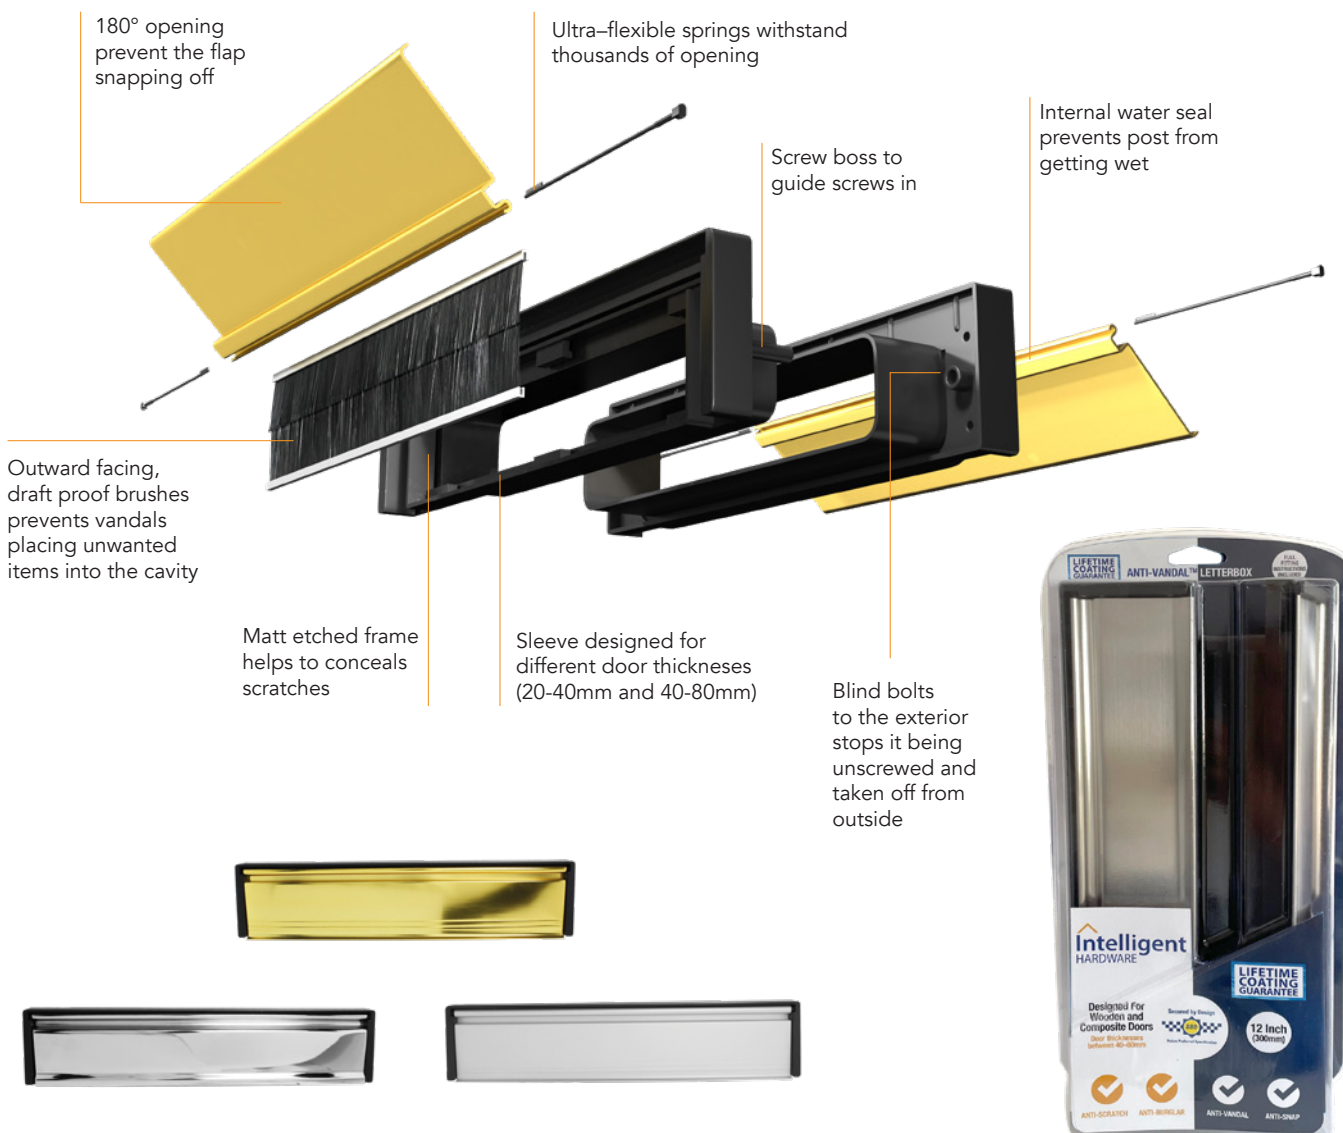

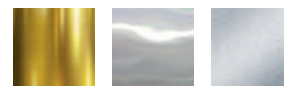

Finish	Material Construction	Code

HOW TO ORDER

Contact our Sales Representative or send
you enquiry to **sales@uaplimited.com**

A young child with light skin and blonde hair, wearing a blue long-sleeved shirt, is reaching up with their right hand to grasp a silver, modern door handle. The handle is mounted on a white door with a vertical wood-grain texture. The child's head is tilted back, and their left hand is visible near the bottom of the handle. The background is a plain, light-colored wall.
