

STRAIGHT SLIM BLACK PULL HANDLE

Introducing the Black Pull Handle from UAP - a pinnacle of contemporary design and enduring quality. Crafted from marine-grade stainless steel, this pull handle boasts a superior durability and a luxurious black powder coated, ensuring a lasting aesthetic appeal with minimal maintenance.

The UAP new modern design in Black finish incorporates the traditional elements of a pull handle, with a stainless-steel and minimalistic look.

TECHNICAL DATA

Made from 1.2mm 316 grade stainless steel.

32mm diameter for sturdier construction.

All pull handles have two fixing points with an individual plate on each.

Comes with an Allen Key and 2 Allen Bolts on each of the up-stands.

3 fixing methods available – hidden fixings, bolt through and back to back.

High quality black powder coated finish.

Size	Straight Product Code	Offset Product Code	Centres	Material Construction	Coating Guarantee

1500mm	PH1500-BLACK-SLIM	PH1500OFF-BLACK-SLIM	1300mm	Stainless Steel	LIFETIME

HIDDEN FIXINGS

The pull handle comes with two fixing points each with an individual plate. These are fitted to wooden and timber doors using three screws. The pull handle then attaches to the plates and is secured with the Allen bolts. The internal fixings are not visible on the door!

BOLT THROUGH

The bolt through method uses a brass thread reducer; this is included in one of the two accessory kits. The brass thread reducer has a 1.5mm thread on the outside which will thread into the upstand. On the internal of the reducer is an N8, this is an 8mm bolt through which provides an ideal position for an internal bolt to fit through. The two Allen bolts give extra protection against vibrations that may take effect on a main road causing bolts to come undone. With the Allen bolts this will not happen!

BACK TO BACK

We have developed a system which is incredibly easy to use and which will reduce fitting times to just seconds. Included in the second accessory kit is two plates which have holes all the way through. Once the plate is fitted on the inside of the door, the bolt can be pushed through the plate and screwed into the brass reducer. The internal pull handle would then be fitted using the hidden fix system. This offers an extremely strong back to back fixing method!
