STOP THE SPREAD

HEALTH & SOCIAL CARE

Health and care settings contribute towards the spread of infections

Out of every 100 patients in acute-care hospitals, seven patients in high-income countries will acquire at least one health care-associated infection (HAI) during their hospital stay. 1 in every 10 affected patients will die from their HAI.

Global Report on Infection Prevention and Control - WHO (6th May 2022)

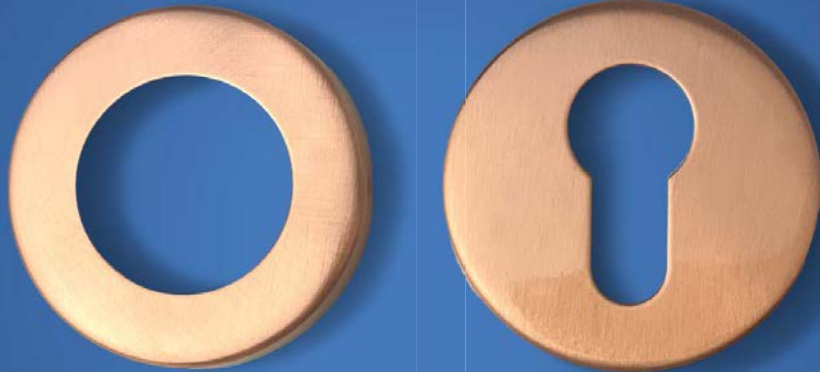

Infection prevention is higher than ever on the agenda...

...for health and care settings in a post-pandemic world. NHS England introduced a National Infection Prevention & Control Manual for England in 2022

Stainless steel harbours bacteria for up to 72 hours

Widely used in health and social care for its durability and cleanliness

CONSUMER

Change in consumer attitudes
